Arabic (Mother Tongue) |
English C1

EXPERIENCE

Full Stack Developer   2/2024 – 7/2024
FocalX Agency   Internship

Received advanced training on web development concepts, with a focus on Laravel and React frameworks.
- Engaged in individual tasks and group projects involving the entire development process, from designing analysis to front-end and back-end development.
- Utilized Trello for streamlined task management and documentation.
- Employed GitHub for version control and facilitating collaborative development.

Full Stack Developer   8/2023 – 10/2023
ExPentech   Contract

Collaborated with a multidisciplinary team consisting of professionals from electronics, mechatronics, and telecommunications.
My responsibilities included:
- Designing and developing full-stack web applications using Laravel, PHP, and React.js, including the implementing of MySQL database structures.
- Building RESTful APIs for seamless front-end and back-end communication.
- Utilizing Jira and Confluence for efficient task management and documentation.
- Employing GitLab for version control and collaborative development.

Backend Developer   4/2023 – 7/2023
LabTix   Contract

Collaborated with a team of software engineers on a Security Information and Event Management project. My responsibilities included:
- Developing and maintaining the backend application using Django and Python with Elasticsearch.
- Utilizing Jira and Confluence for task management and documentation.
- Employing GitLab for version control, enabling collaborative developing and tracking of changes.
